JAMMING OF RADIOBROADCASTS FROM WESTERN EUROPE TO POLAND

A West German newspaper reports that radiobroadcasts from Western Europe to Poland are being jammed from stations located in East Germany, Czechoslovakia, the USSR, and USSR military posts within Poland. 1/
COMMENT: Despite the discontinuance of jamming in Poland in November 1956, there have been continuing reports of jamming of radiobroadcasts from Western Europe to Poland. An OSI analysis of these jamming reports has revealed, however, that they are a result of "spill over" from USSR and Czechoslovakian jammers concentrating on blocking Western radio-broadcasts to Polish-speaking peoples in border areas of the USSR and Czechoslovakia. In addition, it is doubtful that USSR military units stationed in Poland are engaged in jamming activities.
